

Vicious Panfish

Alabama based JBS Fishing, the owners of Vicious Fishing, has again expanded their product line with a new "HI-VIS yellow" **Vicious Panfish** fishing line. It is available in 2-8 lb test and has the same great characteristics of low stretch, low memory, abrasion resistance, affordable price and great visibility to detect the slightest bites. Even in low light conditions Vicious Panfish is the perfect line for bluegill, crappie and other panfish. "You'll be able to pull the biggest slabs out of the toughest cover and detect the finicky biters as well with Vicious Panfish" noted Jeff Martin of Vicious. "We put a ton of R&D into this line because we wanted the same properties of our other products and wanted to hit the mark out of the shoot. There is no doubt we have done it with Vicious Panfish."

From specks in the gulf to crappie in the Mississippi Delta to perch in the frozen north country, **Vicious Panfish** is designed to help you detect more strikes and catch more fish.

Utilizing the ACT(Advanced Copolymer Technology) inherent in all Vicious products allows this line to work well on spinning, spincast and baitcast reels alike.

Vicious Fishing "For the Ultimate Strike" can be reached by (866) 645-0024 or via the Internet at www.vicious-fishing.com.
